SQL proficiency

PROJECTS / OPEN-SOURCE

PLANETPICKS | [LINK](#)

HTML, CSS, JavaScript ,NLP

PlanetPicks, is an eco-friendly product recommender website designed to promote sustainable consumption. It provides users with a visually engaging platform featuring product recommendations, lifecycle analyses, and educational guides on sustainability. Features include a product grid with hover animations, eco-friendly impacts.

AGROSMART

HTML, CSS, JavaScript

AgroSmart offers features like machine learning-powered crop recommendations, plant disease detection, weather forecasting, and a marketplace for farmers. The tech stack includes HTML, CSS, JavaScript, and integrations with Streamlit for advanced functionalities.

AMAZON CLONE

HTML,CSS

Created a responsive user interface that mimics the structure and design of the Amazon homepage. Implemented a product listing grid, navigation bar, and footer to simulate a real e-commerce website.
